706.048	MAXILLOFACIAL EMERGENCY SCREW SELF DRILLING Ø1.8 MM X 18 MM

## Specification

- Screw is available in titanium.

## Indication for use

- The Ø1.8 mm Maxillofacial Emergency Self-Drilling Screw is intended for temporary stabilization of maxillofacial bone fragments in trauma cases. It is primarily used in emergency situations to provide rapid fixation without the need for pre-drilling, ensuring quick and effective bone stabilization during surgical intervention.
