

HOFFMAN EXTERNAL FIXATION INSTRUMENT SET	
SR. NO.	NAME OF INSTRUMENTS
	TRAY 1
1	T-Handle Chuck (Large)
2	T-Handle Chuck (Small)
3	Universal Handle with Grip
4	Allen Key / Hex Driver (Straight)
5	Allen Key / Hex Driver (LType)
6	Combination Spanner / Wrench
7	Rod Holding Handle
8	Clamp Tightening Handle
9	Universal Fixator Adjustment Handle

TRAY 2	
10	Schanz Pin 4.0 mm
11	Schanz Pin 5.0 mm
12	Schanz Pin 6.0 mm (Self -tapping & Trocar tip)
13	Drill Bit 3.2 mm
14	Drill Bit 4.0 mm
15	Drill Bit 4.8 mm
16	Soft Tissue Protection Sleeve
17	Drill Guide Sleeve
18	Carbon Fiber Rod - Short
19	Carbon Fiber Rod - Medium
20	Carbon Fiber Rod - long
MAIN BOX	
21	Standard Pin-to-Rod Clamp
22	Swivel Clamp (Adjustable Angle)
23	Rod-to-Rod Clamp (Straight)
24	Rod-to-Rod Clamp (Angulated)
25	Double Pin Clamp
26	Triple Pin Clamp
27	Ball Joint Clamp
28	Universal Joint Clamp
29	Compression / Distraction Clamp

Specification

- All instruments are available in SS.

Indication for use

- The Hoffmann External Fixation System is used for temporary or definitive stabilization of open, unstable, or complex fractures, especially when soft-tissue injury prevents internal fixation methods such as plating or intramedullary nailing. It is also indicated for fracture fixation, osteotomy, arthrodesis, deformity correction, and bone reconstruction procedures in trauma and orthopaedic surgery.
